

## A Short History of Education (Classic Reprint)

Short History of Education would seem either to promise an ambitious work or to imply a narrow conception of education. The author hopes that neither alternative can be fairly ascribed to this book. He would be the last to regard education as a close preserve which solely concerns schools, colleges and universities; he would urge rather that these are but the agents of the national life which makes them, and employs them, amongst many other educative instruments, in accordance with its own genius and ideals. On the other hand, his powers are not equal to producing a history of civilization, or of culture, or even the story of all the influences which, through the ages, have been brought to bear upon the young within the daily life of some particular community. His book makes no pretence to be a history of Education, if the term denotes a survey of the evolution of human culture generally and in particular of the schools of all known civilizations, ancient and modern, European and Asiatic. He even ventures to doubt whether the material for a trustworthy history of that comprehensive sort is yet available. In any case, such a work could not profitably be short. Yet, while recognizing to the full the restricted sphere in education occupied by schools and their like, it still remains true that these institutions exist and that they have a history. By their very nature, they tend to reflect the life, especially the social, economic and political life, of the larger world about them. The several communities of that world exhibit so many and such important differences in their national development, that perforce the historian must run his matter into national moulds, giving us not a history, but a history of Greece, of England, of France, of some particular nation. Similarly, the history of education is best narrated under national forms, an arrangement which is also
