

## Catch & Reflect Journal: For the student midwife to record catches and reflect

A reflection journal for the student midwife. Being able to reflect upon ones practice is good for any upcoming healthcare practitioner. This journal allows you to reflect upon various encounters a student midwife will participate in, such as witnesses, catches, prenatal & postnatal care. Reflecting can help you to make sense of experiences you may encounter, the good and the ugly. Reflecting upon these will allow you to identify any areas for improvement, thus enabling you to create an action plan to implement those improvements into your everyday practice. This is a journal of reflection which can accompany you throughout your three years of training.
