

The Conspiracy of Ignorance: The Failure of American Public Schools

Never before have public school students been so poorly educated. On national exams, almost 40 percent of fourth graders are reading at below basic levels, and in international contests in math and science, our seventeen-year-olds score near the bottom. In a shocking expose of the Educational Establishment, Martin L. Gross describes how the typical teacher is academically inferior and trained in dubious educational psychology and faddish whole language methods. Indeed, most teachers and administrators come from the bottom third of their class and are outscored on the SAT tests by their own college-bound students. The curriculum is so weak that only one in five students ever take trigonometry, physics, or geography in high school. The usual remedies—from smaller class sizes to federal aid—fail because the Establishment is intent on maintaining both control and lower academic standards. Lucid, persuasive, and meticulously researched, *The Conspiracy of Ignorance* asks—and answers—the questions educators are afraid to ask. This book is desperately needed if American schoolchildren are to prosper in today's competitive world.
